# EXPAND Line for Microsoft Teams Rooms

 Certified for  
Microsoft Teams

# Enable Inclusive Meetings

Working in partnership with Microsoft, EPOS has developed premium speaker-phones and video conferencing solutions that are certified for Microsoft Teams Rooms on Windows and Android™. Through the rich functionalities of Teams combined with premium audio, organizations today can be prepared to enhance collaborations when people are both in and outside the office through an inclusive meeting experience.

## **EPOS solutions for Microsoft Teams Rooms enable:**

- Instant, seamless communication
- Superior audio and full HD video
- An integrated meeting experience suitable for the hybrid workplace.

# EPOS Solution for Microsoft Teams Rooms on Android™

All-in-one video solution for Microsoft Teams Rooms on Android™ for today's smart office. Join meetings with just one touch and enjoy a full Microsoft Teams experience. Enhance collaboration with full HD video, exceptional voice pickup and noise cancellation – powered by EPOS AI™

## Key features

- Device management and automatic updates from Teams Admin center
- Easy deployment
- 4K Camera capture
- Intelligent Picture Framing
- Easy content sharing

# Microsoft Teams Rooms on Android™

This solution is suitable for customers that are looking for the following:

## Small Space Collaboration

EPOS EXPAND Vision 3T is Certified for Focus and Small meeting rooms that require fewer components and cables.

## All-In-One Solution

Easy deployment with the possibility to managing multiple rooms and sites with all the required software, hardware and connections to the cloud service built into EXPAND Vision 3T together with EXPAND 30T.

## Ease of Use

When customers are having locations without on-site technical staff, they will benefit from this plug-and-play installation.

## Cost-Efficient

Android-based solutions that can be implemented on all-in-one solution removes the need for additional components like a dedicated Windows PC

# EPOS Solutions for Microsoft Teams Rooms on Windows

## EXPAND 80T

Unite colleagues with a premium, scalable Bluetooth® speakerphone suitable for Small to Large meeting rooms. Be heard with six adaptive, beamforming microphones that isolate voices from room reverb and ambient noise. A superior speaker for rich, natural sound.

## EXPAND 30T

Portable, wireless, Bluetooth® speakerphone with exceptional audio performance. Supports both personal and small to medium

sized conferencing for up to 8 people. Certified for Microsoft Teams. Includes Bluetooth® USB dongle.

## EXPAND Capture 5

Level the playing field with an intelligent speaker for Microsoft Teams Rooms that empowers your meeting participation whether working remotely or in the office. Transcribe your meetings automatically for quality collaborations as if all in the room together.

# Microsoft Teams Rooms on Windows

This solution is suitable for customers that are looking for the following:

### Broader Selection of Certified Devices

As a customer you will have a broader range of audio and video components in general. From EPOS our speakerphones like EXPAND 80T can cover from Small to Medium and Large meeting rooms. The intelligent speaker EXPAND Capture 5 is also designed for Microsoft Teams Rooms on Windows.

### Larger Meeting Room Solutions

Looking for larger Meeting Rooms solutions with a compute, endpoints and touch

controllers. EXPAND 80T combined with two expansion mics can cover up to Large meeting room requirements.

### Early Access to New Features

The latest room features such as content camera support and whiteboarding will come first to the Microsoft Teams Rooms on Windows and then later be rolled out to Microsoft Teams Rooms on Android devices.

### Remote Guest Join

A possibility for joining third-part online meetings hosted on Cisco Webex and Zoom.

“With the EXPAND 80, EPOS is now offering a certified speakerphone solution for small to large meeting rooms. With Certified for Microsoft Teams devices like the EXPAND 80, customers have trusted solutions that deliver a high-quality experience for Teams meetings and calls, both for rooms where people bring their own device and as part of a Microsoft Teams Room.”

Albert Kooiman,  
Senior Director of Microsoft Teams Devices Partner  
Engineering and Certification, Microsoft Corp.

# The Future of Collaboration

The hybrid workplace is here, and Microsoft Teams Rooms has the latest innovations to enhance everyone's experiences, whether in the room, or remote. Intelligent speakers help create inclusive Teams meetings by ensuring that remote attendees (or those who need a recap later) can easily hear and identify participants contributing in the room.

EXPAND Capture 5 from EPOS allows everyone to focus more on the conversation with their colleagues, and less on taking notes. The intelligent speaker uses advanced speech recognition to accurately capture transcription and attribution (who said what) of up to 10 people in a conference room, even as they talk over each other.

It is easy for users to set up their personal voice signature in the Teams client. Once set up, all voice data is stored in the Microsoft cloud and protected by enterprise-grade security and privacy. IT admins may modify settings and rules for individuals or the entire organization. They can also delete some, or all the data, at any time.

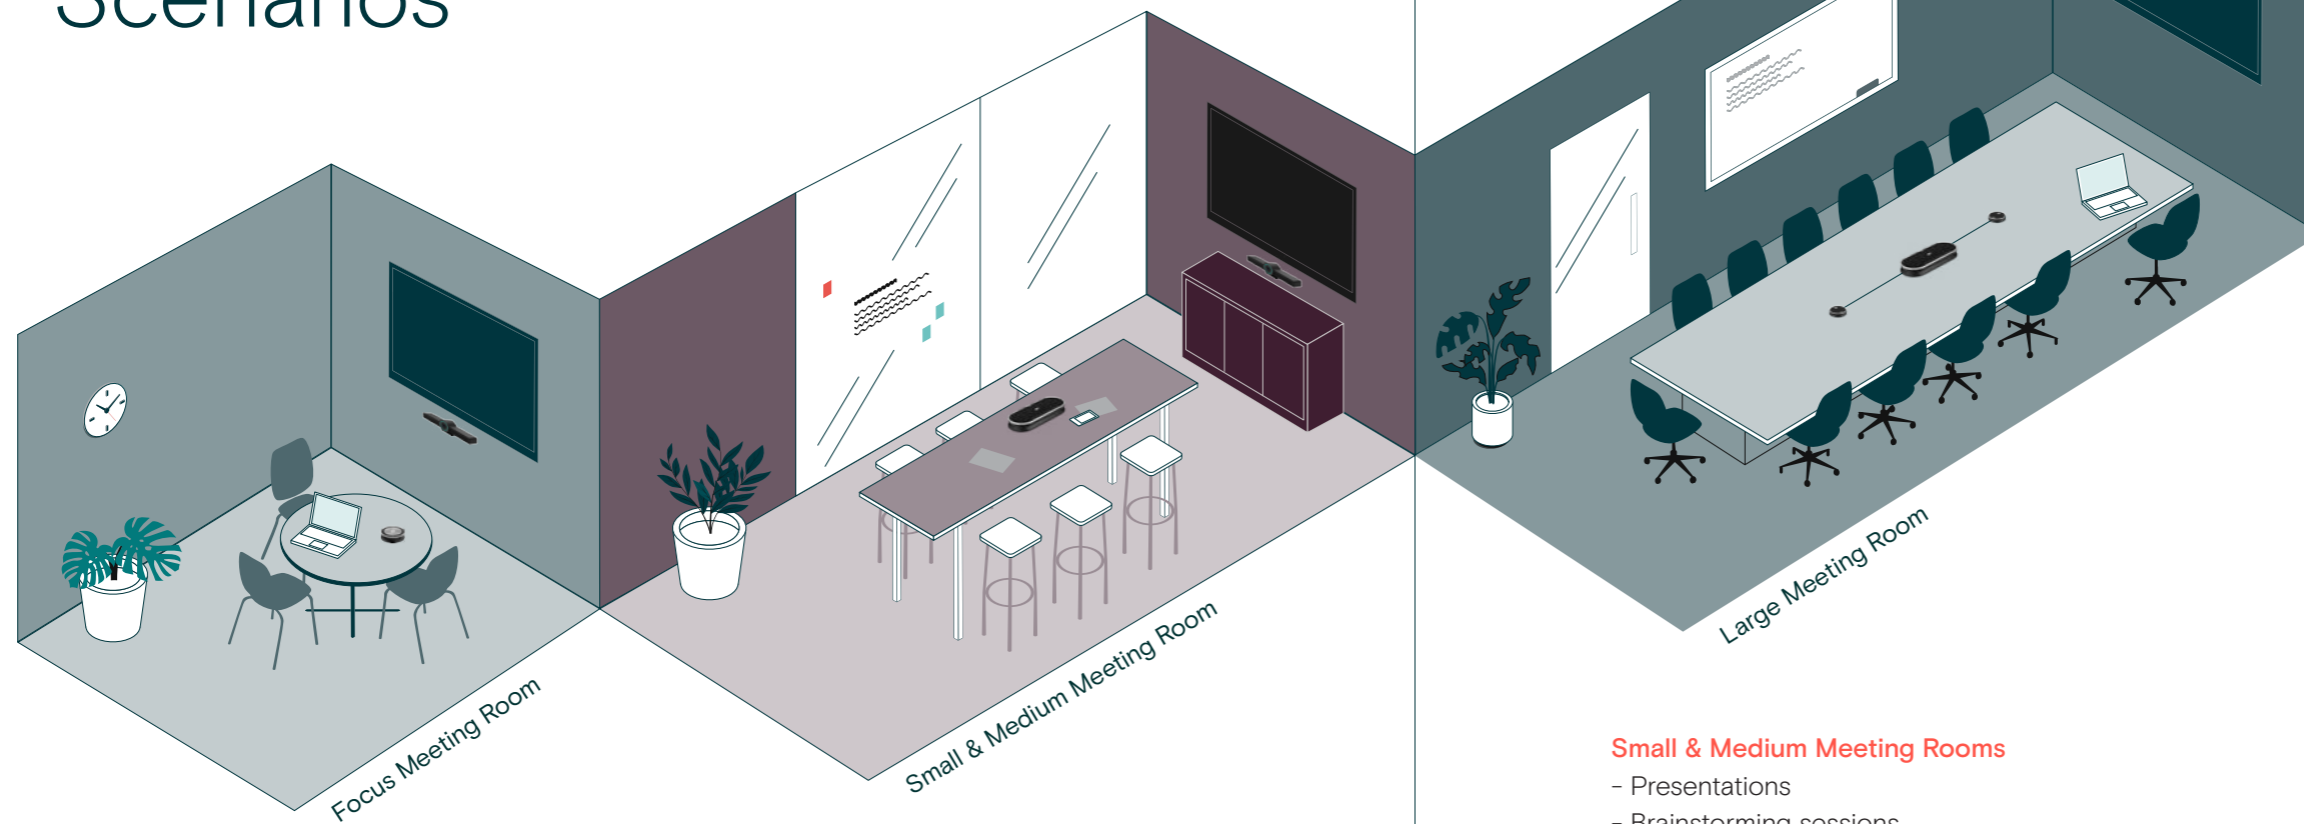

“Microsoft Teams is helping our customers to adopt remote and hybrid work models across different meeting rooms and meeting spaces, and the EXPAND Capture 5 will enable our joint customers to deliver even richer experiences for remote and in room meeting participants. We are grateful to EPOS for their collaboration in bringing the EXPAND Capture 5 to the Microsoft Teams Rooms ecosystem, and look forward to see how customers will use Teams rooms with the EXPAND Capture 5 to connect and collaborate in a rapidly changing world.”

Ilya Bukshteyn, General Manager,  
Microsoft Teams Devices at Microsoft Corp

# Meeting Room Scenarios

Whatever the size or type of meeting, a Microsoft Teams Rooms setup will enable a richer, more integrated meeting experience. EPOS conferencing devices that have been

certified for use in Microsoft Teams Rooms live up to Microsoft's strict certification process, enabling superior audio and video quality.

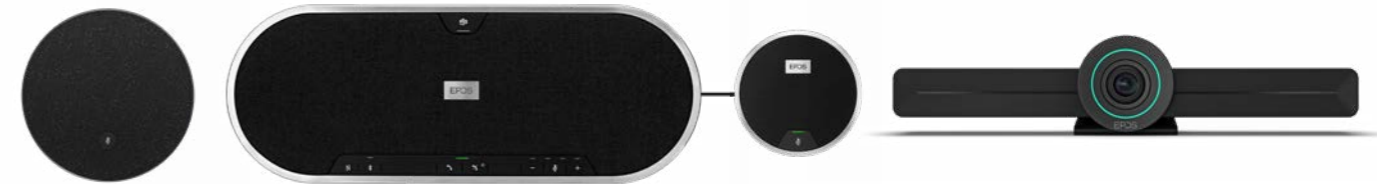

## Focus Meeting Rooms
